

Customer Journey Map

Project Name: Import Data using Transform Maps (Spreadsheet)

	Stage 1 – Prepare Data	Stage 2 – Import & Transform	Stage 3 – Validate & Monitor
Actions	• Prepare employee data in Excel • Check employee details • Save the spreadsheet	• Upload spreadsheet to ServiceNow • Create/execute Transform Map • Map source and target fields	• Verify imported records • Check inserted/updated records • View reports and dashboard
Touchpoint	Excel / Google Spreadsheet	ServiceNow Import Set and Transform Map	Employee Test Table, Reports and Dashboard
Customer Thought	“Is my employee data complete and accurate?”	“Are the fields mapped correctly?”	“Were all records imported and updated correctly?”
Customer Feeling	Concerned about data accuracy	Careful and focused	Satisfied when the results are correct
Process Ownership	HR Administrator	ServiceNow Administrator / HR Administrator	HR Administrator / ServiceNow Administrator
Opportunities	• Provide a standard spreadsheet format • Validate data before upload	• Use Auto Map Matching Fields • Use Coalesce to avoid duplicates	• Add reports and dashboards • Monitor inserted, updated and ignored records
