

Code-Layout, Readability and Reusability

Project Name: Import Data using Transform Maps (Spreadsheet)

Team ID: SWTID-2026-5963

Code Quality Checklist

S.No	Code Quality Parameter	Followed	Remarks
1	Consistent Indentation	Yes	ServiceNow configuration and scripts follow a consistent structure and formatting.
2	Proper File Structure	Yes	Import Set, Transform Map, Employee Test table, Reports and Dashboard are logically organized.
3	Meaningful Variable Names	Yes	Employee-related field names such as Employee ID, Employee Name, Email, Department and Location are clearly defined.
4	Function / Method Names	Yes	Configuration actions and processing steps are clearly identified by their purpose.
5	Code Comments	Partial	Comments/documentation can be added wherever custom configuration or processing logic is used.
6	Modular Design	Yes	Data import, transformation, duplicate prevention and reporting are handled as separate components.
7	No Redundant Code	Yes	The project uses reusable Import Sets and Transform Maps instead of repeated manual data entry.
8	Error Handling	Yes	Import and transformation results are checked through success/state and transform history.

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Import Set	ServiceNow	Employee spreadsheet data import	High
2	Transform Map	ServiceNow	Source-to-target field mapping	High

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
3	Coalesce	ServiceNow	Duplicate prevention and record updates	High
4	Employee Test Table	ServiceNow	Employee record storage	High
5	Reports & Dashboard	ServiceNow	Employee data analysis and monitoring	Medium

The template specifically asks for reusable components/modules and their reusability level.

Overall Code Quality Assessment

Aspect	Rating (1–5)	Comments
Code Layout & Structure	5	Components are logically organized according to their purpose.
Readability	5	Employee fields and project components use clear and meaningful names.
Reusability	5	Import Set, Transform Map and Coalesce can be reused for similar employee-data imports.
Documentation / Comments	4	Project documentation clearly explains the implementation; additional inline comments can improve custom logic documentation.
Overall Score	5 / 5	The project follows a structured and maintainable approach.

Business Application VPS for Growing Teams

Run business apps on a reliable VPS with dedicated resources, stable performance, and more control.
